

# Quality Policy

## Our Commitment

Solstad Offshore is committed to deliver a high-quality product and services to the satisfaction our customers, through planning, implementing, monitoring and reviewing our activities to meet our scheduling and budgetary objectives.

This Policy applies to all areas of Solstad Offshore operations.

### At Solstad Offshore, we shall:

- Continuously maintain the Solstad Integrated Management System (SIMS) which satisfies the requirements of ISO 9001, ISO 14001, ISO 50001, OHSAS 18001, ISM, ISPS, MLC and STCW95 codes & standards and relevant legislative requirement;
- Monitor and measure our performance and develop plans to continuously improve and refine our operations to meet stakeholder expectations;
- Implement a systematic approach to management of operations that consistently creates better results through the process of identifying and managing risks, resources and activities;
- Ensure that all operations meet corporate performance requirements;
- Support and provide resources for auditing schedules and ensure that corrective and preventative improvement actions are implemented in a timely manner;
- Ensure that Solstad Offshore's commitment to Quality products and services is reflected in day to day operations in meeting the objective.

### Responsibility and Accountability:

The CEO has ultimate accountability for ensuring that this policy is implemented at all levels of the organization through demonstrated leadership and the provision and availability of the necessary resources.

All Solstad Offshore employees, subcontractor employees, clients and visitors have an individual responsibility to ensure that all work is of the highest standard and to work together as a team to achieve a service of excellent quality.
